

MINSAIT RECEIVES THE ACCOLADE OF THE MICROSOFT SPAIN PARTNER OF THE YEAR 2024 AWARD

Madrid, June 28, 2024 - Minsait, an Indra Group company, has just been honored with the Microsoft Spain Partner of the Year 2024 award.

The company has been honored as one of Microsoft's top technology partners globally after proving its excellence in innovation and implementation of solutions for its customers based on hyperscaler technology, as well as for its application of AI in its own internal transformation, through the design of solutions, in improving its operations and in software development.

In the words of Luis Abril, Managing Director of Indra and CEO of Minsait, "We are very excited and grateful for this award, which reflects the great work carried out jointly by the Minsait and Microsoft teams. Our two companies feel very committed and aligned in our vision of the importance of correctly adopting artificial intelligence as a transformative technology. From the point of view of both solutions directly related to AI and reflecting on what this resource can bring us in each solution we build, for Minsait, Microsoft is a great ally in our digital commitment to innovation".

The Microsoft Partner of the Year awards recognize Microsoft partners who have optimally developed and deployed Microsoft Cloud applications, services, devices and innovations based on artificial intelligence (AI) over the past year.

These awards are in several categories, with winners chosen from more than 4,700 nominations from more than 100 countries. Minsait has been recognized for providing exceptional solutions and services in Spain.

Following other awards granted by Microsoft - in the Data & Analytics and the Solutions Partner categories - the Microsoft Spain Partner of the Year 2024 consolidates a relationship that began more than 20 years ago and has resulted in ongoing collaboration between Minsait and the hyperscaler. Together, they have responded to the needs resulting from the cloud solutions and services of companies in different sectors of activity and public institutions; they have aligned efforts in data analytics; and they have developed a framework for organizations to accelerate their leap to AI as part of their strategy in a competitive context dominated by knowledge, among other noteworthy actions.

Nicole Dezen, managing partner and corporate vice president of Microsoft, today congratulated the winners and finalists of the Microsoft Partner of the Year Awards 2024. "The momentum generated by numerous AI and Copilot announcements this year has fueled innovation from our partners, enabling innovative services and solutions for customers. I am inspired by the capability and creativity of our partner ecosystem, as well as the excellence of this year's winners, who have made the most of AI and Microsoft Cloud in their solutions," she added.

The Microsoft Partner of the Year 2024 awards are announced ahead of the start of MCAPS for partners, the hyperscaler's digital event from July 10 to 11.

Award-winning companies will receive their recognition at the MCAPS Start for Partners, ahead of Microsoft Ignite week celebrations in November.

Additional details on the 2024 Awards are available from Microsoft Partner blog: https://aka.ms/POTYA2024_announcement
