

Mobile World Congress 2026

INDRA GROUP MAKES AN IMPACT AT MOBILE WORLD CONGRESS WITH BWT ALPINE FORMULA ONE™ TEAM CAR AND ITS SOVEREIGN AI PROPOSAL FOR HIGHLY COMPLEX COMPETITIVE ENVIRONMENTS

- The leading Spanish multinational devoted to technology and defence is exhibiting a BWT Alpine Formula One Team F1 car at its stand in Barcelona
- Through its partnership with BWT Alpine Formula One Team, the alliance will facilitate the integration of IndraMind's sovereign artificial intelligence platform into one of the sporting world's most demanding technological environments

Barcelona, 4 March 2026. – Indra Group has chosen the Mobile World Congress (MWC) as the stage to present to the general public the potential of its sovereign artificial intelligence platform, IndraMind, through one of the greatest exponents of motor racing: a BWT Alpine Formula One Team car, on display at the company's stand during the event.

Formula 1 is the most innovative, demanding and competitive championship in the sporting world, and one of the largest technology laboratories in existence. The recent agreement signed by the corporation with BWT Alpine Formula One Team, under which it becomes its technology partner, represents a unique opportunity to demonstrate how artificial intelligence can make the difference in environments of maximum operational complexity, under intense competitive pressure and where real-time decision-making is critical.

This collaboration envisages Indra Group, through its sovereign AI offering IndraMind, to access a top-tier technological laboratory from which to draw insights into innovation, optimisation and strategic agility, while applying its technology in an environment where efficiency, anticipation and operational excellence are essential.

"Formula 1 represents the highest level of technological and strategic demand. The opportunity to apply IndraMind in this environment is an extraordinary prospect to demonstrate how sovereign artificial intelligence delivers real value when every decision counts and every millisecond is decisive," said Yon Munilla, Commercial Director of IndraMind.

AI by design across all capabilities

IndraMind is a platform conceived with AI by design across all its capabilities, from the ingestion and correlation of large volumes of data to decision-making, process automation and the generation of actionable intelligence. Its key differentiator lies in its ability to consolidate information from multiple sources, provide a unified view and deliver real-time situational awareness.

In a highly demanding environment such as Formula 1, success can no longer depend solely on the car and the driver's talent. Intelligent management of data, people and resources have also become decisive factors, gaining even greater relevance in 2026 with the entry into force of the new technical and sporting regulations promoted by the Fédération Internationale de l'Automobile (FIA).

An increasingly complex and regulated competitive and sporting environment

The objective of the regulatory changes introduced by the FIA is to make Formula 1 a more competitive, sustainable, and safer championship. In the season that begins this weekend, the cars are lighter and more compact, incorporate active aerodynamics with movable wings, and the balance between thermal and electric power changes significantly. In addition, the energy that can be stored and used per lap is strictly regulated, forcing teams to optimise its management not only per lap, but also according to on-track battles and key moments during the race.

The partnership with BWT Alpine Formula One Team allows IndraMind to co-create real use cases that will support entry into new markets such as motorsport or aeronautics, as well as to demonstrate technological capabilities in mission-critical contexts, underpinned by sovereignty and cyber resilience.

About IndraMind

IndraMind (<https://www.indramind.com/en>) is Indra Group's technological initiative that develops sovereign artificial intelligence within a cyber-resilient environment to provide comprehensive protection for citizens, territories, and critical infrastructures across both physical and digital domains. Designed as the group's "digital brain," it delivers cognitive superiority through advanced artificial intelligence capabilities that enable combat hybrid warfare. threat anticipation and optimize decision-making with a comprehensive perspective on security and defence.

About Indra Group

Indra Group (<https://www.indragroup.com/en>) is the foremost Spanish multinational and one of the leading European companies that focus on defence and advanced digitalization. It stands at the forefront of the defence, space, air traffic management, mobility, and transformative technologies through Minsait, and it integrates its sovereign AI, cybersecurity and cyberdefence capabilities into IndraMind. Indra Group is paving the way to a more secure and better-connected future through innovative solutions, trusted relationships and the very best talent. Sustainability is an integral part of its strategy and culture in order to overcome current and future social and environmental challenges. At the close of the 2025 financial year, Indra Group posted revenues of €5,457 billion and had a local presence in 46 countries and business operations in over 140 countries.
