

INDRA GROUP RECEIVES AWS RECOGNITION AS “PARTNER OF THE YEAR” IN SPAIN AND EXPANDS ITS CAPABILITIES IN AGENTIC AI

- Indra Group was recognised as Regional Consulting Partner of the Year during the AWS Summit Madrid 2026.
- The award adds to the recent achievement of the AWS Agentic AI Services Competency, a certification that places the company among the most advanced AWS partners for the industrialisation of agentic AI
- Indra Group’s success within the AWS ecosystem reflects its sustained commitment to applied innovation, execution at scale, and the development of solutions with tangible impact for its clients

Madrid, June 3, 2026. – Indra Group has been recognized as AWS Regional Consulting Partner of the Year at the AWS Summit Madrid 2026. The award recognizes Indra’s contribution to the growth of joint business with AWS.

“This recognition reflects our ability to transform technology into real and sustainable results for organisations. Today the true differentiator is not only to innovate, but to execute and scale innovation with business impact”, states Sebastián Bamonde, Director of Tech Operations at Indra Group.

Pioneer in the industrialization of agentic AI

In parallel, Indra Group has recently reached another milestone within the AWS ecosystem with the achievement of the AWS Agentic AI Services Competency, which validates the company’s competence to design and implement autonomous AI systems that can perceive, reason, and act with minimal human oversight, and coordinate complex processes, while maintaining strong commitments to responsible AI development, governance, and monitoring.

Achievement of the competency reflects Indra Group’s commitment to a new generation of artificial intelligence aimed not only at automating tasks, but at transforming complete business processes through intelligent models capable of operating end-to-end across all business processes.

As Sebastián Bamonde explains, “artificial intelligence is evolving towards models capable of operating complete processes autonomously and under supervision, and at Indra Group we are driving that transformation by combining generative AI capabilities, advanced automation, and multi-agent architectures. This is allowing us to gain efficiency, accelerate the evolution of our solutions, and apply intelligent models in critical operations and highly regulated environments. Having AWS recognise our capabilities in this area places us among the players who are leading the industrialisation of AI”, he adds.

Recognition within AWS ecosystems

Indra Group has been a member of the AWS Partner Network (APN) for more than a decade, with a proven track record of generating value for clients.

As a further reflection of its role within the APN, Indra Group reached second place in Spain in the AWS Prospecting Hero programme in 2025 and previously received the AWS Rising Star Partner of the Year award in 2024. Indra Group is an AWS Premier Tier Partner, the highest level within the APN, which reflects its capabilities, certifications, and client experience.

The company holds a broad set of advanced technical competencies in key areas such as artificial intelligence—including generative AI and agentic AI—the migration and modernisation of systems to the cloud, solutions for public administrations, automation and efficient management of technology environments (DevOps), and

projects for the energy and utilities sector, among others. These distinctions, audited by certified external entities, demonstrate its ability to address complex digitalisation initiatives with real and measurable results.

Its various recognitions demonstrate that Indra Group is an AWS partner capable of combining innovation, execution, and scalability —three key pillars for transforming the potential of cloud and artificial intelligence into real impact for organisations.

About Indra Group

Indra Group (www.indracompany.com) is the foremost Spanish multinational and one of the leading European companies in the areas of defence and advanced digitalization. It stands at the forefront of the defence, space, air traffic management, mobility, and transformational technology businesses through Minsait, and it integrates its sovereign AI, cybersecurity, and cyberdefence capabilities into IndraMind. Indra Group is paving the way to a more secure and better-connected future through innovative solutions, trusted relationships, and the very best talent. Sustainability is an integral part of its strategy and culture in order to overcome current and future social and environmental challenges. At the close of the 2025 financial year, Indra Group posted revenues totaling €5.457 billion and had a local presence in 46 countries and business operations in over 140 countries.
